Built by Exporters, for Exporters, our processing mill was created with a deep understanding of what global markets demand—exceptional quality, consistency, compliance, and reliability. Every metre of fabric is processed to meet the exacting standards required by leading international brands, while delivering the same excellence to the domestic market. Our new state-of-the-art facility in Surat features an advanced ETP, reflecting our commitment to responsible and sustainable manufacturing. With GOTS, OCS, and BSCI certifications nearing completion, we are shaping the future of textile processing through innovation, integrity, and world-class quality.

Aarje Texwork LLP is based on over 40,000 sq ft at Rajhans Zesto in Palsana, Gujarat to create the next generation of process unit for printing, dyeing and pre-process.

We aim to be complaint as well as certified with BSCI, GOTS, OCS and LEEDS by the end of the year.
